

The most up-to-date and comprehensive global reference on existing and developmental crop protection compounds, biologicals and

Ag Chem Base **online**

THE AGROCHEMICAL ACTIVES DATABASE

A database containing technical profiles of ALL developed and commercial agrochemicals and biological agents. Updated twice a year in May and October.

Agranova's AG CHEM BASE brings the key information on crop protection compounds and biological agents together in a simple, but powerful, format that anyone can use within 10 minutes. Agranova has done all the hard work! In a few minutes you can answer questions such as:

- ⇒ *Which rice fungicides have been developed since 2014 ? Which are launched ?*
- ⇒ *Which records have been updated since January 2017?*
- ⇒ *List all agrochemicals incorporating a trifluoromethylphenyl moiety.*
- ⇒ *Which herbicidal biological agents are currently marketed ?*
- ⇒ *Create a list of new leads in Sumitomo Chemicals' R&D pipeline*
- ⇒ *What are the structures of the leading neo-nicotinoid insecticides?*
- ⇒ *What is "Dayside" and which company is developing this brand?*
- ⇒ *How many active ingredients are listed (3,524 as of October 2018)*

Information is updated biannually, so that a single, seamless database is maintained.

Ag Chem Base - as easy as ACB!

Staying informed on the latest developments in the world's newest chemical, biological and GM crop technologies in global crop protection is vital for all those involved in the ag chem industry. Agranova's **Ag Chem Base** incorporates information on all developmental and commercial crop protection compounds and biological agents published in the Ag Chem New Compound Review over the last 30 years. Mail, fax or e-mail your order today in order to receive your copy. Although all entries have been identified by Agranova, many of the profiles have been validated by the inventing companies, giving the Ag Chem Base a reliability unavailable in competitive products.
